

Cat No: GIST481 – Gastrointestinal stromal tumor tissue array

Lot#	Cores	Size	Cut	Format	QA/QC
GIST48101	48	2mm	4um	6X8	H&E, IHC anti-CD117, CD34, S100

Recommended applications: For research use only. RNA or protein tissue profiling using IHC or ISH suitable for gastrointestinal stromal tumor related studies.

Description: Gastrointestinal stromal tumor (GIST) tissue array including duplicated 24 cases of uninvolved mucosa and GIST tissues.

All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They can be stored for use at 4C for up to six months from the date of shipment. **There may be 5 to 10% of tissue core loss.**

Array Position	Sex	Age	Anatomic Site	Pathology	Grade	Stage
A01	M	48	Stomach	Normal	null	null
A02	M	80	Intestine, small intestine	Normal	null	null
A03	M	72	Stomach	Gastrointestinal stromal tumor, GIST	null	null

Notes: Bake at 60C for ~60 minutes before use. If antigen retrieving is needed, it is important to avoid **direct-boiling and high pH or high strength** antigen retrieving buffer.
